

UnderSink

Fresh water on demand has never been easier, whether for drinking, ice cubes or cooking. The UnderSink system delivers all the benefits of clean, healthy and good tasting water at an unbeatable value compared to other filtration and bottled water products. Simple to install, cost-effective to maintain and eco-friendly, the UnderSink utilizes reusable filter housings with biodegradable filter media to eliminate environmentally harmful waste while also offering a price advantage and nice looking addition to your kitchen.

The UnderSink Installation Kit includes everything you need to install and enjoy:

- Can accommodate up to three filter stages
- Choose from a variety of filter media to customize your water
- Optional additions of water cooler for chilled and refreshing water
- Your choice of faucets
- Includes all hardware to connect to your sink water line and faucet
- Only requires hand tools to install

Easy to Install

installs in 30 minutes

Easy to maintain

filter media only needs to be changed every 6 months (under average usage)

Healthy

filters out harmful impurities in the water

Customizable

available with a variety of filter media options to choose from for superior water quality

Superior Water Quality

can accommodate up to three customized filters for superior water filtration

Delicious

removes odor and undesirable tastes in the water caused by chlorine and other impurities

Eco-Friendly

unlike other filtration products, the EZ-turn filter housing (included with the UnderSink set) is reusable and discarded filters are biodegradable or recyclable

Economical

lower in cost to purchase and maintain compared to other filtration and bottled water products
